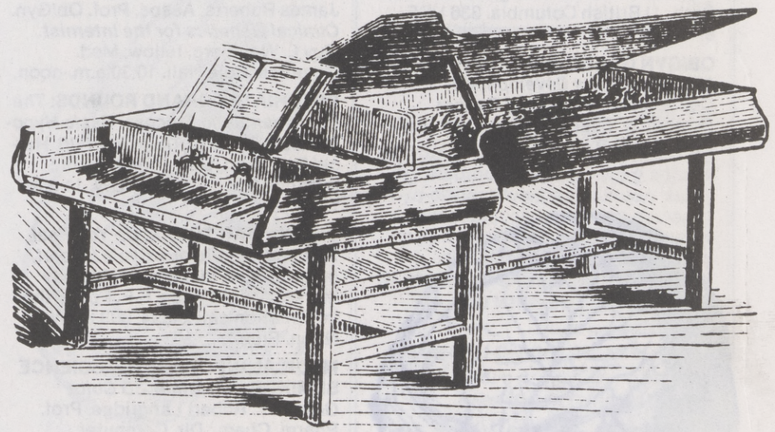
Nobel Laureate Murray Gell-Mann will present the lecture, "Elementary Particles: The Building Blocks of All Matter," during the Fifth Annual Gordon Tomkins Memorial Lecture and Concert on Friday, October 10 in Cole Hall from 3 to 5 p.m.

Gell-Mann, Millikan Professor of Theoretical Physics, Lauritsen Laboratory, California Institute of Technology, received the 1969 Nobel Prize in Physics for his work on the theory of elementary particles.

Following the lecture, pianist Paul Hersh of the S.F. Conservatory of Music will perform a work by Robert Shumann, "Davidsbundlertanze, Op. 6." The lecture and concert is free and open to the public.

The lecture and concert was established to honor Tomkins, one of America's leading pioneer researchers in the study of hormone action who died in 1975. He was a professor of Biochemistry and vice-chairman of the Department of Biochemistry and Biophysics as well as an accomplished classical and jazz musician.



The following is an update on actions taken in response to the recommendations of the Chancellor's Emergency Task Force on Personal Safety:

GARAGE SECURITY

- Most pedestrian and vehicle entrances and exits are now locked on weekdays from 7 p.m. to 6 a.m. and all day on weekends and holidays. During these restricted hours pedestrians from Irving Street should use the Ambulatory Care Center entrance and elevators to reach Parnassus. Drivers should use the public parking entrance and exit on Parnassus. Bicyclists parking on the lower or A level should exit upward using the Millberry Union garage elevators.

GENERAL CAMPUS SECURITY

- Installation of peepholes in the doors along the corridors of HSE and HSW will be completed by the middle of October.
- Department managers are urged to continue watching for building deficiencies affecting personal safety and to report them promptly. Managers also should make arrangements for securing name tags for those staff members working non-standard hours. Requests for tags should be sent to Laurel Eber, Personnel Department, Room U12, or call x4100.

SAFETY CLASSES

- A Self Defense Workshop will be held Saturday, October 18 in Room N 517 from 9 a.m. to 5 p.m. It is free for UCSF students, faculty and staff; general $15.
- Advanced Self Defense Classes are available on Thursdays, October 23 and 30 from 7:30 to 10 p.m. in Room N 517. The fee is $18 for everyone.
- Tear Gas (MACE) classes will be given on Thursday, October 16 and Wednesday, November 12 from 5 to 7 p.m. in Room C 130. It is free for UCSF students, faculty and staff. Preregistration is required for all classes. For further information on classes call x5683.

NEWS BRIEFS

A new study by a UCSF researcher presents additional support for geographic "regionalization" of certain surgical procedures.

Reporting in the September issue of *Medical Care,* Harold S. Luft, associate professor of Health Economics, concludes that several variable factors — hospital size, teaching status, expense per patient day and geographic location — do not significantly alter the strong correlation between the number of surgical procedures a hospital performs and its respective mortality rates.

geries are connected with the experience a hospital has in performing the specific procedure, not with its overall size, Luft says. He adds that small hospitals with proven records for specific procedures possibly should be the specialists in their region.

In an earlier study, Luft and two Stanford colleagues found a clear relationship between surgical volume and mortality for certain procedures such as open heart surgery and prostate surgery. Hospitals in which 200 or more of these operations were done annually had death rates 25-41 percent lower than hospitals with lower volumes.

In his follow-up study, titled "Relation Between Surgical Volume and Mortality: An Exploration of Causal Factors and Alternative Models," Luft said his goal was to take the original research one step further to see if other outside factors, which vary from hospital to hospital, could exert an independent effect on mortality outcomes.

The research is supported by a grant from the Henry J. Kaiser Family Foundation.

The UCSF Child Care/Study Center will dedicate its playground to Betty Sooy, wife of Chancellor Sooy, on Wednesday, October 22 at 2:30 p.m. at the Child Care Center.

The playground is being dedicated to Mrs. Sooy "in recognition of her concern for and support of programs which have benefitted the children of UCSF students, faculty, staff, and the neighboring community." The development of the playground was made possible through donations from the Alumni Faculty Association.

The first UCSF Board of Overseers has been formed to advise the Chancellor, the deans and campus leaders on issues of concern to the campus. Caspar Weinberger, vice president and general counsel of the Bechtel Corporation, will serve as the first chairman of the board.

Chancellor Sooy said that the establishment of the board has been a longstanding goal of his, and that the advice of business and community leaders is critically important if UCSF is to continue to play a key role as one of the country's leading academic health sciences centers. He added that issues are far more complex today than they were even five years ago, and an advisory group of experienced and concerned friends will be invaluable to the campus.

The UCSF Board of Overseers will meet on the campus three times a year, with the first meeting to be held on October 13.

The week of October 5-12 has been designated to honor UCSF Volunteers. Included in the activities for the week are: displays in Medical Science and Moffitt lobbies, buttons distributed to volunteers and staff expressing the theme "VIP - UCSF Volunteers - Important People," individuals going into the community to speak on various topics to assist in recruitment, and an annual luncheon held at University House on Thursday, October 9 at noon, which includes an awards presentation.

A committee established to advise UC President David Saxon on the state and health of the UC campuses will visit UCSF on Wednesday and Thursday, November 5 and 6.

Faculty, students, staff, alumni, and members of the community are invited to submit applications to address the committee and present their views. The meeting will be held on that Wednesday from 3:30 to 5:30 p.m. Applications should be sent to the President's Office, 714 University Hall, University of California, Berkeley, 94720, by October 22. Requests should include the applicant's name, title (students give major and year), telephone number, and a brief summary of the subject to be covered.

Because of expected demand, each applicant's oral presentation may not exceed five minutes, including time for questions to and from the committee, and should not repeat material covered in the application. Applicants will be selected by the committee, and will be notified by telephone of their individual presentation time and place of the meeting.

Members of the committee include: J. Herman Blake, provost, Oakes College and professor, Sociology, UCSC; William J. Bouwsma, Sather Professor, History, UC-Berkeley; Roger Revelle, emeritus professor, Oceanography, UCSD and emeritus director, Scripps Institute of Oceanography; George Taborsky, professor, Biochemistry, UCSB; M. Diana Sherwood, assistant to the dean, Special Programs, UCI; and Nancy Holland, graduate student, Philosophy, UC-Berkeley.

The School of Dentistry's Senior Citizen Community Dental Program has been selected as the first place winner in the 1980 Preventive Dentistry Award Competition of the American Student Dental Association. Fifty-four dental schools submitted entries in the nationwide competition.

Brian S. Adams, fourth-year dental student who organized the project, will accept the award, a $1,000 cash prize and specially designed plaque, at the 1980 ASDA Annual Session, October 10 in New Orleans.

The Senior Citizen Dental Program, begun earlier this year, offers consultation and screening sessions by UCSF dental students under faculty supervision at senior centers in several S.F. neighborhoods. As a result, hundreds of elderly patients have been referred for low cost treatment at the new UCSF Dental Clinics on Parnassus, the UCSF Community Dental Clinics at SFGH and 100 Buchanan Street, or to other facilities.

A three-year $361,000 grant for research in chronic illness and long-term care has been given to the UCSF School of Nursing.

The grant, awarded by the Division of Nursing, Health Resources Administration, is under the direction of Susan R. Gortner, associate dean for Research, School of Nursing, and professor in the Department of Family Health Care Nursing. Co-director is William L.
